PROFILE

Final-year Computer Engineering student at ENICarthage with experience in full-stack development, AI, e-commerce and cybersecurity. Skilled in Python, Java, TypeScript, React, Angular and FastAPI, with hands-on experience in APIs, databases, RAG/LLMs, Docker and CI/CD. Seeking a PFE in software engineering, AI or full-stack development within an international team.

PROFESSIONAL EXPERIENCE

R&D Full-Stack Developer Intern – Exocoms Group (France)

Jun 2026 – Aug 2026

- Developed and migrated a luxury e-commerce platform to Odoo 19 using Python, JavaScript, QWeb and SCSS, with custom themes and workflows.
- Integrated Marketpay, Ingram Micro and Packlink APIs, and built AI Beauty Advisor, search and analytics features; deployed via Odoo.sh.

Mobile Development Intern – MCM SOL

Aug 2025 – Sep 2025

- Developed NativeScript/Angular frontend screens for a pharmaceutical stock-management application and refined UI/UX in Figma.

SELECTED PROJECTS

SentinelAI – AI-Assisted Security Scanner

2026 – Present

Python, FastAPI, PostgreSQL, React, TypeScript, Docker, Kubernetes

- Built a security platform combining SAST, secret and CVE scanning with a React dashboard and unified findings model.
- Implemented RAG-based AI explanations grounded in OWASP/NVD (Recall@5 = 0.94), with Docker/Kubernetes and GitHub Actions CI.

Full-Stack E-Commerce Platform – Parapharmacy (Production)

Sep 2026 – Present

Next.js, TypeScript, Express, PostgreSQL, Prisma, Redis, Docker

- Designed and deployed a production e-commerce platform with transactional checkout, server-side inventory/pricing, JWT/RBAC and CI/CD.

AI-Powered Incident & Maintenance Platform

Mar 2026 – May 2026

Angular, Spring Boot, MySQL, WebSockets, JWT, Gemini API

- Built a full-stack incident and maintenance platform with AI assistance, real-time notifications, RBAC and analytics.

Omnia – Aid Tracking & Traceability Platform

Feb 2026

NestJS, React, TypeScript, MySQL, Docker, Leaflet

- Developed a charity platform for vulnerability scoring, geolocated visits, stock management and donation traceability with JWT/RBAC.

Real-Time Last-Mile Delivery Platform

Apr 2026

Java, Spring Boot, Android, WebSocket/STOMP, RxJava, MySQL

- Developed an offline-first Android application with real-time messaging and alerts, backed by a secure Spring Security/JWT API.

EDUCATION

National Engineering School of Carthage (ENICarthage), Tunisia

Sept 2024 – Present

Engineering Degree in Computer Engineering

Preparatory Institute for Engineering Studies of Monastir (IPEIM), Tunisia

Sept 2022 – June 2024

Preparatory Cycle in Physics and Chemistry (PC)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++ , SQL

Backend: FastAPI, Spring Boot, Node.js, NestJS, Odoo, REST APIs

Frontend: React, Next.js, Angular, HTML5, CSS3, QWeb, SCSS

AI & Security: RAG, LLMs, LangChain, NLP, Embeddings, ML, SAST, CVE Analysis

Data & DevOps: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Docker, Kubernetes, GitHub Actions, Linux

Engineering: OOP, Clean Architecture, Microservices, Agile/Scrum, CI/CD

LEADERSHIP & ACTIVITIES

- Hackathon Maratech – Team Leader (2026):** led 3 developers to build a full-stack charity platform in 48 hours.
- IEEE Student Branch – ENICarthage (2024–2026):** AI/embedded workshops, IEEE Xtreme and media committee.

CERTIFICATIONS & LANGUAGES

Certifications: Cisco CCNA 1 | freeCodeCamp Responsive Web Design

Languages: Arabic (native) | French (C1) | English (B2) | German (A1.2)
